

Overview

IntelliNet Technologies is a leading provider of network convergence solutions that accelerate the deployment of next generation applications and services. Its customers include the telecom industry's leading network operators and suppliers of network equipment, application software, and hosted services. Having amassed considerable expertise in signaling, applications, and networking, IntelliNet's product portfolio and professional services team help customers increase revenues, get to market quickly and reduce cost.

Founded in 1992, IntelliNet quickly became a leading provider of engineering services to the telecom industry. With the advent of IP networks, IntelliNet excelled in bridging IP networks with SS7 by offering SIGTRAN and other key protocol stacks. The company expanded to offer customized solutions to OEMs based on its highly reliable Accelero™ Application Development Platform.

IntelliNet was one of the first companies to deploy the Diameter protocol stack in 2006 and hosted the most recent Diameter operability event. IntelliNet's Accelero™ Diameter has achieved the highest levels of performance and reliability and is used by leading network operators around the globe.

In 2008 IntelliNet acquired Azaire Networks, a developer and market leader of Wi-Fi data offload solutions. In 2011 IntelliNet spun off its data offload businesses, including its Wireless Services Gateway and its Femtocell Gateway.

In 2012 IntelliNet announced its Diameter Routing Engine™, an exceptional suite of Diameter Signaling Controller (DSC) solutions. The DRE can be configured to an operator's specific network requirements.

IntelliNet's ISO-9001 certification reflects an organization dedicated to exceeding its customers' expectations for performance and reliability.

Products and Technology

IntelliNet's Accelerero™ product portfolio has broad applications coverage, including mobile data offload, prepaid calling and data, roaming, messaging, location, presence and fixed mobile convergence (FMC).

IntelliNet was one of the first companies to deploy the Diameter protocol stack in 2006 and hosted the most recent Diameter operability event. IntelliNet's Accelerero™ Diameter has achieved the highest levels of performance and reliability and is used by leading network operators around the globe.

A Diameter pioneer and market leader, IntelliNet offers an exceptional suite of Diameter Signaling Controller (DSC) solutions, the Diameter Routing Engine™. The standards compliant DRE includes a Diameter Routing Agent (DRA), Diameter Edge Agent (DEA), a Diameter Translation Agent (TLA) and a Diameter Interworking Function (IWF).

This continuously evolving suite of products coupled with the company's application development knowledge ensures seamless integration of existing and next-generation systems and protocols.

Services

The company's value-added services team works with customers to adapt IntelliNet's technologies to support the development of innovative custom product solutions. IntelliNet deploys its intellectual property from a blend of talented engineers, core products, and powerful implementation systems to help customers accelerate time to market, reduce cost, and achieve competitive advantage in the marketplace.

The Accelerero platform is a key component of IntelliNet's value add. Accelerero embodies the knowledge and experience of IntelliNet's engineering team gained over 15 years of delivering high performance solutions to the telecom industry.

Services include:

- Development of network infrastructure elements that scale quickly and efficiently
- Consulting and development services to architect, implement, test and deploy user applications
- Adapting an existing product or service for IMS compatibility
- Interworking between legacy networking functions and the IMS

IntelliNet's technical experts have the experience to assume complete responsibility for a project from requirements definition to system verification – freeing up your resources to focus on other priorities.

Performance and Quality

IntelliNet has a proven track record of delivering carrier grade solutions that achieve "5 nines" reliability. IntelliNet's ISO-9001 certification reflects an organization dedicated to exceeding its customers' expectations for performance and reliability.

Customers

IntelliNet's customers include the world's leading network equipment providers and service providers. Customers include Amdocs, Alcatel-Lucent, Bridgewater Systems, Motorola Solutions, Nokia Siemens Networks, Tekelec, TeleCommunication Systems (TCS) and XIUS/bcgi, .
